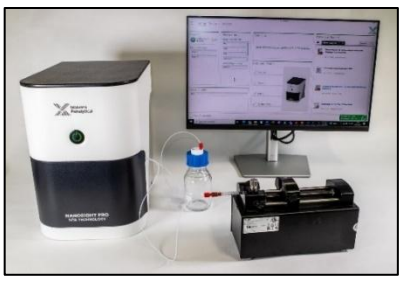
Characterization of Nanoparticles and Extracellular Vesicles with NanoSight Pro

June 10th, 2026
at 3.00 PM
on MS Teams

link: Nanosight Pro presentation by Alfatest | Partecipazione alla riunione | Microsoft Teams

Speaker: Dr. Nicolò Ricci – Product Specialist (Alfatest)


NanoSight Pro is an advanced platform designed for the particle-by-particle characterization of nanoparticles and extracellular vesicles. The technology combines light scattering, Brownian motion analysis, and fluorescence to provide high-resolution measurements of size, concentration and fluorescence-based differentiation.
